Ron,

After you left I learned that the top assistant to then Governor John B. Connally is positive that he could not have been hit by the bullet that hit JFK, non-fatally. He saw Connally's wounds and was familiar with them at the hospital.

If this did not happen, no solution.

His name is Stimson or Stinson.

If you can't locate him I can tell you how - through Earl Golz of the Dallas Times Herald.

But Earl is pretty hep on this subject.
